9000 Spinner Display Assembly Instructions

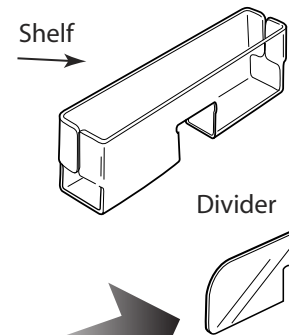

Tools Needed: Phillips Screwdriver.

2, Starting from the bottom, slide one shelf at a time through the slots in the core, center, center and pull down to lock into place.

Header Holder

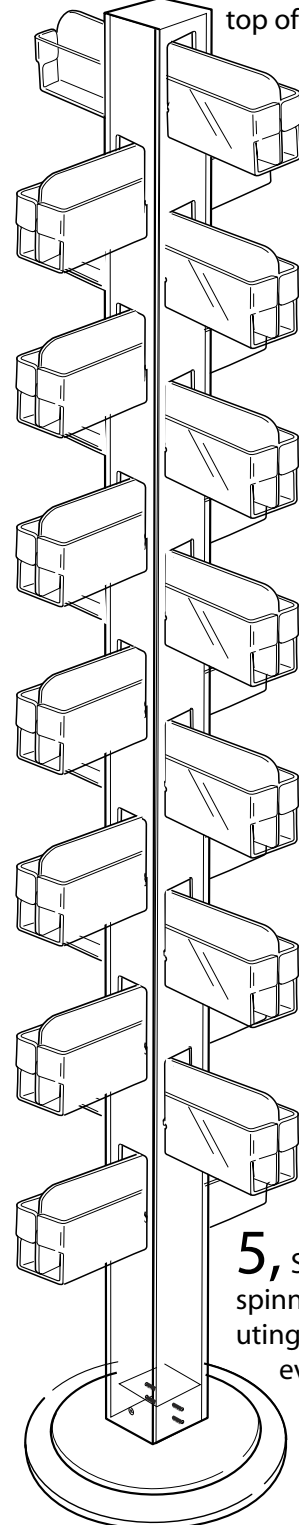

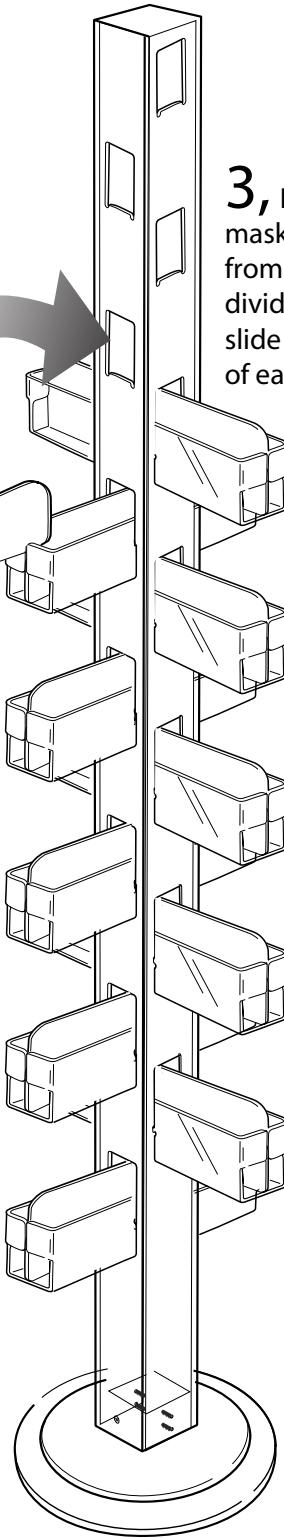

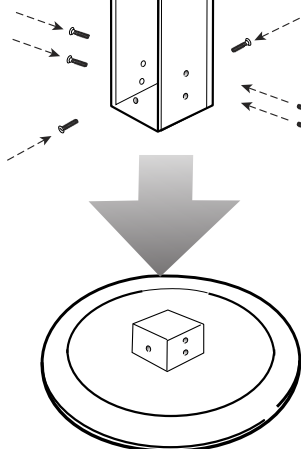

4, Peel off tape on header holder, exposing adhesive, and stick in place on top of unit.

3, Peel off masking paper from flat dividers and slide into center of each shelf.

1, Place the core over the cube on the base, matching screw holes. Insert a screw into each hole and tighten evenly, making sure the core stays seated evenly on the base.

Screws
(6 included)

5, Stock your spinner distributing weight evenly.
